Permission is hereby granted, free of charge, to any person obtaining the knowledge of this algorithm (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

1. Free personal / business use is allowed in all instances to create, use, and sell their IPF or part of it with no license required. Free use does not include building or using as example auction software to sell IPFs including their own without a license.
2. Commercial use requires a SPECIFIC licensing agreement. That agreement must be paid to and signed by the author allowing the use of the HlyGrail algorithm prior to use. Commercial use means using the software in a way to make a profit FROM the software not your IPF. As example, you can make a patent with the software and it is yours with no restrictions, but you cannot make software to create, serve, or auction IPFs without a license. Another example would be a musician can protect their music with the IPF with no license, but a music company cannot sell their IPF music without a license. This is not an exclusive list but an example to demonstrate the difference between personal / business use of the IPF and making money with the IPF HlyGrail Algorithm.

If you do not have a specific licensing agreement, then you agree to a general license agreement that is, by your use of the algorithms or derivations of it for business (profit or not for profit) purposes, that the author of the HlyGrail algorithm equally owns 50% of all your assets related to the use of the HlyGrail payable on demand in exchange for the past or current use of the HlyGrail Algorithm.

HlyGrail is copyright 2013, 2016, 2018, 2023 Genus Enterprises, All Rights Reserved. You can and are encouraged to use HlyGrail as a preface to your hash when making an IPF.

The above copyright notice and this permission notice shall be included in all copies of software algorithms but not necessary in simple image IPF NFTs.
